OUSSAMA
BENOUJJA

JUNIOR FULL-STACK/DEVOPS

Junior Full-Stack Developer with a strong foundation in JavaScript, backend development, and Linux
systems. Comfortable working across the entire web stack, deploying applications to cloud environments,
and managing servers using SSH and Docker. Fast learner, technically curious, and motivated to build and
maintain reliable, scalable web applications.

EDUCATION

FullStack Dev MERN stack
Youcode | UM6P Safi, Morocco   2024-2026

- currently building my MERN stack as a fullstack JS dev here

Industrial Electrical Technician
ISTA Berkane OFPPT, Morocco   2022-2024

- Installation, maintenance, and troubleshooting of industrial electrical systems and equipment.

EXPERIENCE

Full-Stack Developer Intern — Sygma.AI
Casablanca, Morocco   June - August 2025

- Worked on a 3D-enhanced e-commerce application using mesh-generation models to improve product visualization.
- Contributed to frontend views using React and backend logic using Laravel.
- Implemented API endpoints and optimized data flow between frontend and backend.
- Collaborated with the engineering team to integrate AI-driven 3D models into the product catalog.

Maintenance Technician Intern — Colaimo (Dairy Products)
Oujda, Morocco   January 2024

- Performed routine maintenance on production line equipment.
- Supported technicians in diagnosing failures and maintaining continuous production.
- Assisted in electrical and mechanical interventions across the facility
